Laser Physics (Oxford Master Series in Physics)

Simon Hooker, Colin Webb

Laser Physics (Oxford Master Series in Physics) Simon Hooker, Colin Webb

In *Laser Physics* the interaction of radiation and matter, and the principles of laser operation are treated at a level suitable for fourth-year undergraduate courses or introductory graduate courses in physics, chemistry or engineering. The factors which determine efficiency, wavelength coverage, output power, and beam quality of the different classes of laser are treated both in terms of fundamental theory and practical construction aspects. Details of established types of solid-state, semiconductor, and gas lasers are examined together with the techniques that enable their output to be converted widely across the spectrum. The latest advances in high power fibre lasers, femtosecond lasers, and X-ray lasers are explained. The text is liberally illustrated with more than 300 diagrams. An extensive bibliography is provided, together with numerical problems in each chapter. Solutions are available via the web.

From reader reviews:

Steven Bemis:

Have you spare time for just a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the particular Mall. How about open as well as read a book eligible Laser Physics (Oxford Master Series in Physics)? Maybe it is for being best activity for you. You know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have various other opinion?

Frances Lockhart:

The book Laser Physics (Oxford Master Series in Physics) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Laser Physics (Oxford Master Series in Physics)? A few of you have a different opinion about guide. But one aim that will book can give many facts for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or facts that you take for that, you could give for each other; it is possible to share all of these. Book Laser Physics (Oxford Master Series in Physics) has simple shape however, you know: it has great and big function for you. You can look the enormous world by open and read a guide. So it is very wonderful.

Margaret Walker:

Typically the book Laser Physics (Oxford Master Series in Physics) has a lot info on it. So when you make sure to read this book you can get a lot of gain. The book was published by the very famous author. The writer makes some research ahead of write this book. That book very easy to read you can get the point easily after reading this book.

Rebecca Dryden:

Your reading sixth sense will not betray you actually, why because this Laser Physics (Oxford Master Series in Physics) e-book written by well-known writer who knows well how to make book which might be understand by anyone who have read the book. Written throughout good manner for you, leaking every ideas and writing skill only for eliminate your hunger then you still doubt Laser Physics (Oxford Master Series in Physics) as good book not only by the cover but also through the content. This is one reserve that can break don't ascertain book by its protect, so do you still needing yet another sixth sense to pick this particular!? Oh come on your studying sixth sense already told you so why you have to listening to a different sixth sense.
