Supercritical Fluids Technology in Lipase Catalyzed Processes

Sulaiman Al-Zuhair, Hanifa Taher

Supercritical Fluids Technology in Lipase Catalyzed Processes Sulaiman Al-Zuhair, Hanifa Taher

Enzymes are currently used in various industries, most commonly in food, detergents, and pharmaceuticals production. Lipases are hydrolytic enzymes that demonstrate great potential as an alternative to conventional catalysts in a number of industrial applications. A complete understanding of enzymes, and their proteins structure and environmental behavior, can greatly aid in the further development of industrial applications.

Supercritical Fluids Technology in Lipase Catalyzed Processes provides basic information about enzymes, their sources, reaction kinetics, and main industrial applications. The book focuses in lipases. their main sources, structure, and features, with an emphasis on their specificity and interfacial activity, and presents proven techniques for isolating, extracting, and purifying.

Comprised of six compact chapters, this comprehensive guide introduces:

- Immobilization techniques and immobilized lipases that allow repeated use (which is essential from an economic point of view)
- Different bioreactor configurations using immobilized lipases
- The latest information on the available technologies in lipolytic reactions
- The advantages of nonaqueous media in biochemical synthesis over aqueous and solvent-free systems
- Material on the use of lipases in nonaqueous media to overcome the drawbacks usually encountered with the use of conventional chemical catalysts
- The use of supercritical fluids (SCFs) as a green alternative reaction medium
- Factors affecting the physical properties of lipases in this medium and, hence, their activity and stability
- A case study using supercritical carbon dioxide (SC-CO₂) for biodiesel production
- Novel, cutting-edge technology, using immobilized enzymes to reduce the overall production cost

Supercritical Fluids Technology in Lipase Catalyzed Processes outlines the main industrial applications of common enzymes and discusses relevant challenges and innovations emerging in the field.

From reader reviews:

William Petterson:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the book entitled Supercritical Fluids Technology in Lipase Catalyzed Processes. Try to stumble through book Supercritical Fluids Technology in Lipase Catalyzed Processes as your buddy. It means that it can to be your friend when you sense alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you a lot more confidence because you can know every little thing by the book. So , let's make new experience and also knowledge with this book.

Deana Broom:

A lot of people always spent their own free time to vacation or go to the outside with them friends and family or their friend. Were you aware? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity here is look different you can read any book. It is really fun for yourself. If you enjoy the book that you read you can spent 24 hours a day to reading a book. The book Supercritical Fluids Technology in Lipase Catalyzed Processes it is rather good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. If you did not have enough space bringing this book you can buy the actual e-book. You can m0ore simply to read this book from the smart phone. The price is not too costly but this book provides high quality.

Dawn Bliss:

Playing with family inside a park, coming to see the ocean world or hanging out with buddies is thing that usually you may have done when you have spare time, subsequently why you don't try matter that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Supercritical Fluids Technology in Lipase Catalyzed Processes, you are able to enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh come on its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.

Lois Wiggins:

Your reading sixth sense will not betray a person, why because this Supercritical Fluids Technology in Lipase Catalyzed Processes publication written by well-known writer who really knows well how to make book that could be understand by anyone who else read the book. Written in good manner for you, leaking every ideas and producing skill only for eliminate your current hunger then you still uncertainty Supercritical Fluids Technology in Lipase Catalyzed Processes as good book not merely by the cover but also by the content. This is one book that can break don't determine book by its include, so do you still needing another

sixth sense to pick this!?! Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.
