The U.S. Geological Survey (USGS) has been working with the Albany Water, Gas, and Light Commission to monitor ground-water quality and availability since 1977. This report presents the findings for July 2005 through June 2006 and summarizes the ground-water and surface-water conditions for 2005. Water levels in 14 wells were continuously monitored in Dougherty County, Georgia. Water levels in 12 of those wells were above normal, one was normal, and one was below normal. Ground-water samples collected from the Upper Floridan aquifer indicate that nitrate levels have increased in 13 wells and decreased in two wells from a year earlier. A sample also was collected from the Flint River. A trilinear diagram showing the percent composition of selected major cations and anions indicates that the ground-water quality of the Upper Floridan aquifer at the Albany wellfield is distinctly different from the water quality of the Flint River. To improve the understanding of the ground-water flow system and nitrate movement in the Upper Floridan aquifer, the USGS is developing a ground-water flow model in the southwest Albany area, Georgia.

**From reader reviews:**

**Christine Flint:**

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a move, shopping, or went to the particular Mall. How about open or even read a book titled U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July? Maybe it is to get best activity for you. You understand beside you can spend your time using your favorite's book, you can better than before. Do you agree with it is opinion or you have various other opinion?

**Lorene Lord:**

This U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July usually are reliable for you who want to be described as a successful person, why. The key reason why of this U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July can be one of the great books you must have is usually giving you more than just simple looking at food but feed you actually with information that maybe will shock your before knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions in e-book and printed versions. Beside that this U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day task. So , let's have it and luxuriate in reading.

**Regina Schubert:**

Hey guys, do you wants to finds a new book to learn? May be the book with the subject U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July suitable to you? Typically the book was written by popular writer in this era. The actual book untitled U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July is a single of several books in which everyone read now. This particular book was inspired many people in the world. When you read this guide you will enter the new dimension that you ever know prior to. The author explained their strategy in the simple way, consequently all of people can easily to know the core of this guide. This book will give you a large amount of information about this world now. So that you can see the represented of the world in this book.

**Ella Carlson:**

Do you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you find out the inside because don't judge book by its cover may doesn't work this is difficult job because you are scared that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer could be U.S. Geological Survey Georgia Water Science Center and Albany Water, Gas, and Light Commission Cooperative Water Program-Summary of Activities, July why because the great cover that make you consider about the content will not disappoint anyone. The inside or content is actually fantastic as the outside or maybe cover. Your reading sixth sense will directly guide you to pick up this book.
