Essentially a collection of all of Boenninghausen's work into one book, this treatise contains both a Materia Medica and a Repertory. The Boenninghausen method emphasises modalities and the characteristic aspects of symptoms and has particular utility when addressing these issues. One of the greatest pieces of homeopathic literature, incorporating the combined observations & logic of Boenninghausen & the wide & wise observations garnered by Dr. Boger from long years of study & practice. Very useful for working out cases rich in particulars. It introduced several newer features such as complete symptom, fever totality, clinical rubrics, separate concomitants & pathological generals.
