Dictionary of Computer Vision and Image Processing Robert B. Fisher, Toby P. Breckon, Kenneth Dawson-Howe, Andrew Fitzgibbon, Craig Robertson, Emanuele Trucco, Christopher K. I. Williams

Written by leading researchers, the 2nd Edition of the *Dictionary of Computer Vision & Image Processing* is a comprehensive and reliable resource which now provides explanations of over 3500 of the most commonly used terms across image processing, computer vision and related fields including machine vision. It offers clear and concise definitions with short examples or mathematical precision where necessary for clarity that ultimately makes it a very usable reference for new entrants to these fields at senior undergraduate and graduate level, through to early career researchers to help build up knowledge of key concepts. As the book is a useful source for recent terminology and concepts, experienced professionals will also find it a valuable resource for keeping up to date with the latest advances.

New features of the 2nd Edition:

- Contains more than 1000 new terms, notably an increased focus on image processing and machine vision terms;
- Includes the addition of reference links across the majority of terms pointing readers to further information about the concept under discussion so that they can continue to expand their understanding;
- Now available as an eBook with enhanced content: approximately 50 videos to further illustrate specific terms; active cross-linking between terms so that readers can easily navigate from one related term to another and build up a full picture of the topic in question; and hyperlinked references to fully embed the text in the current literature.

From reader reviews:

Matthew Segal:

In this 21st millennium, people become competitive in every way. By being competitive today, people have do something to make all of them survives, being in the middle of the actual crowded place and notice through surrounding. One thing that at times many people have underestimated this for a while is reading. Yep, by reading a publication your ability to survive improve then having chance to remain than other is high. For you personally who want to start reading some sort of book, we give you this kind of Dictionary of Computer Vision and Image Processing book as beginning and daily reading guide. Why, because this book is greater than just a book.

Abram Huffman:

Now a day people that Living in the era wherever everything reachable by interact with the internet and the resources in it can be true or not call for people to be aware of each info they get. How a lot more to be smart in getting any information nowadays? Of course the reply is reading a book. Looking at a book can help folks out of this uncertainty Information particularly this Dictionary of Computer Vision and Image Processing book because book offers you rich facts and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it as you know.

Tia Sargent:

The reason why? Because this Dictionary of Computer Vision and Image Processing is an unordinary book that the inside of the guide waiting for you to snap it but latter it will zap you with the secret this inside. Reading this book beside it was fantastic author who have write the book in such amazing way makes the content inside of easier to understand, entertaining approach but still convey the meaning completely. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of benefits than the other book have got such as help improving your expertise and your critical thinking way. So , still want to hesitate having that book? If I were being you I will go to the book store hurriedly.

Stephen Medley:

As a college student exactly feel bored to help reading. If their teacher expected them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Dictionary of Computer Vision and Image Processing can make you feel more interested to

read.
