Modeling in Biopharmaceutics, Pharmacokinetics and Pharmacodynamics: Homogeneous and Heterogeneous Approaches (Interdisciplinary Applied Mathematics) Panos Macheras, Athanassios Iliadis

The state of the art in Biopharmaceutics, Pharmacokinetics, and Pharmacodynamics Modeling is presented in this new second edition book. It shows how advanced physical and mathematical methods can expand classical models in order to cover heterogeneous drug-biological processes and therapeutic effects in the body.

The book is divided into four parts; the first deals with the fundamental principles of fractals, diffusion and nonlinear dynamics; the second with drug dissolution, release, and absorption; the third with empirical, compartmental, and stochastic pharmacokinetic models, with two new chapters, one on fractional pharmacokinetics and one on bioequivalence; and the fourth mainly with classical and nonclassical aspects of pharmacodynamics. The classical models that have relevance and application to these sciences are also considered throughout. This second edition has new information on reaction limited models of dissolution, non binary biopharmaceutic classification system, time varying models, and interface models. Many examples are used to illustrate the intrinsic complexity of drug administration related phenomena in the human, justifying the use of advanced modeling methods.

This book will appeal to graduate students and researchers in pharmacology, pharmaceutical sciences, bioengineering, and physiology.

Reviews of the first edition:

"This book presents a novel modelling approach to biopharmaceutics, pharmacokinetics and pharmacodynamic phenomena. This state-of-the-art volume will be helpful to students and researchers in pharmacology, bioengineering, and physiology. This book is a must for pharmaceutical researchers to keep up with recent developments in this field." (P. R. Parthasarathy, Zentralblatt MATH, Vol. 1103 (5), 2007)

"These authors are the unique (or sole) contributors in this area that are working on these questions and bring a special expertise to the field that is now being recognized as essential to understanding biological system and kinetic/dynamic characteristics in drug development...This text is an essential primer for those who would envision the incorporation of heterogeneous approaches to systems where homogeneous approaches are not sufficient to describe the system." (Robert R. Bies, Journal of Clinical Pharmacology, Vol. 46, 2006)

From reader reviews:

Phillip Ruiz:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The data you get based on what kind of guide you read, if you want have more knowledge just go with training books but if you want sense happy read one using theme for entertaining such as comic or novel. The actual Modeling in Biopharmaceutics, Pharmacokinetics and Pharmacodynamics: Homogeneous and Heterogeneous Approaches (Interdisciplinary Applied Mathematics) is kind of reserve which is giving the reader unpredictable experience.

Willie Navarro:

Spent a free time and energy to be fun activity to complete! A lot of people spent their leisure time with their family, or their own friends. Usually they carrying out activity like watching television, about to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your own free time/ holiday? Might be reading a book could be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the e-book untitled Modeling in Biopharmaceutics, Pharmacokinetics and Pharmacodynamics: Homogeneous and Heterogeneous Approaches (Interdisciplinary Applied Mathematics) can be great book to read. May be it can be best activity to you.

Charles Whittaker:

Do you like reading a publication? Confuse to looking for your best book? Or your book had been rare? Why so many question for the book? But virtually any people feel that they enjoy for reading. Some people likes reading through, not only science book but novel and Modeling in Biopharmaceutics, Pharmacokinetics and Pharmacodynamics: Homogeneous and Heterogeneous Approaches (Interdisciplinary Applied Mathematics) or others sources were given knowledge for you. After you know how the great a book, you feel desire to read more and more. Science e-book was created for teacher or maybe students especially. Those textbooks are helping them to put their knowledge. In additional case, beside science publication, any other book likes Modeling in Biopharmaceutics, Pharmacokinetics and Pharmacodynamics: Homogeneous and Heterogeneous Approaches (Interdisciplinary Applied Mathematics) to make your spare time more colorful. Many types of book like this one.

Joe Timmons:

What is your hobby? Have you heard that question when you got pupils? We believe that that query was given by teacher with their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person just like reading or as studying become their hobby. You should know that reading is

very important and book as to be the factor. Book is important thing to include your knowledge, except your own teacher or lecturer. You discover good news or update regarding something by book. Numerous books that can you go onto be your object. One of them is this Modeling in Biopharmaceutics, Pharmacokinetics and Pharmacodynamics: Homogeneous and Heterogeneous Approaches (Interdisciplinary Applied Mathematics).
