Algae of Australia: Marine Benthic Algae of North-Western Australia (Algae of Australia Series) John M. Huisman

This volume is an authoritative floristic account of the marine green and brown algae of northwestern Australia and includes 68 genera and 171 species. Each taxonomic level, from division to species, is fully described, incorporating current nomenclature, morphology, keys and numerous illustrations, many in color. It is the first detailed account of the marine plants of tropical Western Australia and documents numerous taxa recorded for the first time from the region, together with newly described species of *Avrainvillea*, *Codium*, *Sargassum* and *Ulva*.
