Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) Sriraam Natarajan, Kristian Kersting, Tushar Khot, Jude Shavlik
This SpringerBrief addresses the challenges of analyzing multi-relational and noisy data by proposing several Statistical Relational Learning (SRL) methods. These methods combine the expressiveness of first-order logic and the ability of probability theory to handle uncertainty. It provides an overview of the methods and the key assumptions that allow for adaptation to different models and real world applications. The models are highly attractive due to their compactness and comprehensibility but learning their structure is computationally intensive. To combat this problem, the authors review the use of functional gradients for boosting the structure and the parameters of statistical relational models. The algorithms have been applied successfully in several SRL settings and have been adapted to several real problems from Information extraction in text to medical problems. Including both context and well-tested applications, Boosting Statistical Relational Learning from Benchmarks to Data-Driven Medicine is designed for researchers and professionals in machine learning and data mining. Computer engineers or students interested in statistics, data management, or health informatics will also find this brief a valuable resource.

From reader reviews:

Ann Gross:

Book is to be different for each grade. Book for children right up until adult are different content. To be sure that book is very important for us. The book Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) had been making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The book Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) is not only giving you considerably more new information but also to be your friend when you really feel bored. You can spend your spend time to read your guide. Try to make relationship while using book Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science). You never experience lose out for everything if you read some books.

Cassandra Martin:

As people who live in typically the modest era should be update about what going on or details even knowledge to make them keep up with the era which can be always change and progress. Some of you maybe will update themselves by reading books. It is a good choice for you but the problems coming to a person is you don't know which one you should start with. This Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Esther Ponce:

This Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) is great publication for you because the content which is full of information for you who also always deal with world and still have to make decision every minute. This kind of book reveal it info accurately using great arrange word or we can declare no rambling sentences inside it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but difficult core information with attractive delivering sentences. Having Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) in your hand like finding the world in your arm, facts in it is not ridiculous a single. We can say that no publication that offer you world within ten or fifteen small right but this publication already do that. So , this really is good reading book. Hi Mr. and Mrs. stressful do you still doubt this?

Mabel Maddux:

Publication is one of source of understanding. We can add our expertise from it. Not only for students but also native or citizen have to have book to know the revise information of year to be able to year. As we know those books have many advantages. Beside most of us add our knowledge, also can bring us to around

the world. Through the book Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science) we can have more advantage. Don't someone to be creative people? For being creative person must like to read a book. Just simply choose the best book that acceptable with your aim. Don't become doubt to change your life at this book Boosted Statistical Relational Learners: From Benchmarks to Data-Driven Medicine (SpringerBriefs in Computer Science). You can more inviting than now.
