From Dust To Stars: Studies of the Formation and Early Evolution of Stars (Springer Praxis Books / Astronomy and Planetary Sciences) Norbert S. Schulz

Studies of stellar formation in galaxies have a profound impact on our understanding of the present and the early universe. The book describes complex physical processes involved in the creation of stars and during their young lives. It illustrates how these processes reveal themselves from radio wavelengths to high energy X-rays and gamma -rays, with special reference towards high energy signatures. Several sections devoted to key analysis techniques demonstrate how modern research in this field is pursued.
