Network Programming with Perl

Lincoln D. Stein

Network Programming with Perl Lincoln D. Stein

Any developer who's comfortable with Perl can build remarkably powerful TCP/IP network applications -- no C required! In *Network Programming with Perl*, Lincoln Stein shows how, step-by-step, with extensive code examples. Modeled on W. Richard Stevens' legendary Unix network programming book, this book opens up network programming to a new generation of programmer: Web developers ready to build serious network applications and solve complex network problems. Stein begins with an overview of Perl's increasingly powerful networking facilities; then introduces Berkeley Sockets, and the UDP and TCP protocols at the heart of network programming. He presents Perl's IO::socket API, which simplifies the creation and use of sockets; demonstrates how to create forking servers; and introduces practical techniques for creating multithreaded and multiplexed applications. Modeled upon the style of Stevens, and using extensive sample code, Stein demonstrates all of the key features. *Network Programming with Perl* also includes chapter-length explanations of creating Internet modules for FTP and Telnet; Mail and News; and Web services.

From reader reviews:

Donna Cook:

Nowadays reading books become more and more than want or need but also get a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of publication you read, if you want send more knowledge just go with training books but if you want feel happy read one together with theme for entertaining for example comic or novel. Often the Network Programming with Perl is kind of e-book which is giving the reader capricious experience.

Elsie Canada:

Information is provisions for those to get better life, information these days can get by anyone at everywhere. The information can be a knowledge or any news even restricted. What people must be consider while those information which is inside the former life are challenging be find than now's taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you find the unstable resource then you get it as your main information it will have huge disadvantage for you. All of those possibilities will not happen with you if you take Network Programming with Perl as your daily resource information.

Daryl Pena:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day to upgrading your mind expertise or thinking skill even analytical thinking? Then you have problem with the book when compared with can satisfy your small amount of time to read it because all this time you only find reserve that need more time to be read. Network Programming with Perl can be your answer because it can be read by an individual who have those short extra time problems.

Issac Molina:

What is your hobby? Have you heard which question when you got pupils? We believe that that query was given by teacher to their students. Many kinds of hobby, Every person has different hobby. So you know that little person similar to reading or as looking at become their hobby. You must know that reading is very important in addition to book as to be the factor. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them is actually Network Programming with Perl.
