Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing)

Li Deng, Dong Yu

Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) Li Deng, Dong Yu

Deep Learning: Methods and Applications provides an overview of general deep learning methodology and its applications to a variety of signal and information processing tasks. The application areas are chosen with the following three criteria in mind: (1) expertise or knowledge of the authors; (2) the application areas that have already been transformed by the successful use of deep learning technology, such as speech recognition and computer vision; and (3) the application areas that have the potential to be impacted significantly by deep learning and that have been benefitting from recent research efforts, including natural language and text processing, information retrieval, and multimodal information processing empowered by multi-task deep learning. Deep Learning: Methods and Applications is a timely and important book for researchers and students with an interest in deep learning methodology and its applications in signal and information processing. "This book provides an overview of a sweeping range of up-to-date deep learning methodologies and their application to a variety of signal and information processing tasks, including not only automatic speech recognition (ASR), but also computer vision, language modeling, text processing, multimodal learning, and information retrieval. This is the first and the most valuable book for "deep and wide learning" of deep learning, not to be missed by anyone who wants to know the breathtaking impact of deep learning on many facets of information processing, especially ASR, all of vital importance to our modern technological society." - Sadaoki Furui, President of Toyota Technological Institute at Chicago, and Professor at the Tokyo Institute of Technology.

From reader reviews:

Monte Lawson:

As people who live in the particular modest era should be up-date about what going on or data even knowledge to make all of them keep up with the era that is always change and advance. Some of you maybe can update themselves by looking at books. It is a good choice for yourself but the problems coming to you actually is you don't know which you should start with. This Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Mary McDonald:

Reading a e-book tends to be new life style on this era globalization. With reading you can get a lot of information that will give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. A great deal of author can inspire their own reader with their story or their experience. Not only the storyplot that share in the textbooks. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors nowadays always try to improve their skill in writing, they also doing some investigation before they write to the book. One of them is this Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing).

Thomas Burke:

Your reading sixth sense will not betray anyone, why because this Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) guide written by well-known writer who knows well how to make book which might be understand by anyone who have read the book. Written within good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still hesitation Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) as good book not merely by the cover but also from the content. This is one publication that can break don't ascertain book by its deal with, so do you still needing one more sixth sense to pick this particular!?! Oh come on your reading through sixth sense already said so why you have to listening to a different sixth sense.

Carmen Pinto:

That publication can make you to feel relax. That book Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) was vibrant and of course has pictures on there. As we know that book Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) has many kinds or variety. Start from kids until teens. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading in which.
