How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) Michael J. Campbell, Stephen J. Walters
A complete guide to understanding cluster randomised trials

Written by two researchers with extensive experience in the field, this book presents a complete guide to the design, analysis and reporting of cluster randomised trials. It spans a wide range of applications: trials in developing countries, trials in primary care, trials in the health services. A key feature is the use of R code and code from other popular packages to plan and analyse cluster trials, using data from actual trials. The book contains clear technical descriptions of the models used, and considers in detail the ethics involved in such trials and the problems in planning them. For readers and students who do not intend to run a trial but wish to be a critical reader of the literature, there are sections on the CONSORT statement, and exercises in reading published trials.

- Written in a clear, accessible style
- Features real examples taken from the authors' extensive practitioner experience of designing and analysing clinical trials
- Demonstrates the use of R, Stata and SPSS for statistical analysis
- Includes computer code so the reader can replicate all the analyses
- Discusses neglected areas such as ethics and practical issues in running cluster randomised trials

How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research provides an excellent reference tool and can be read with profit by statisticians, health services researchers, systematic reviewers and critical readers of cluster randomised trials.

From reader reviews:

Alyson Hardy:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite guide and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice). Try to the actual book How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) as your pal. It means that it can to get your friend when you really feel alone and beside that course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know anything by the book. So , we should make new experience and also knowledge with this book.

Anthony Harrison:

The publication untitled How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) is the reserve that recommended to you to see. You can see the quality of the publication content that will be shown to you actually. The language that author use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, and so the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) from the publisher to make you a lot more enjoy free time.

David Ramos:

This How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) is great e-book for you because the content which can be full of information for you who all always deal with world and still have to make decision every minute. This specific book reveal it details accurately using great manage word or we can declare no rambling sentences inside it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but tricky core information with wonderful delivering sentences. Having How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) in your hand like getting the world in your arm, info in it is not ridiculous a single. We can say that no publication that offer you world in ten or fifteen small right but this guide already do that. So , it is good reading book. Hi Mr. and Mrs. busy do you still doubt that?

Vivian Obrien:

In this period globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The health of the world makes the information simpler to

share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. Typically the book that recommended for your requirements is How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) this guide consist a lot of the information with the condition of this world now. This specific book was represented so why is the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. Typically the writer made some exploration when he makes this book. That's why this book appropriate all of you.
