Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) Luis Barreira, Claudia Valls

This text provides an accessible, self-contained and rigorous introduction to complex analysis and differential equations. Topics covered include holomorphic functions, Fourier series, ordinary and partial differential equations.

The text is divided into two parts: part one focuses on complex analysis and part two on differential equations. Each part can be read independently, so in essence this text offers two books in one. In the second part of the book, some emphasis is given to the application of complex analysis to differential equations. Half of the book consists of approximately 200 worked out problems, carefully prepared for each part of theory, plus 200 exercises of variable levels of difficulty.

Tailored to any course giving the first introduction to complex analysis or differential equations, this text assumes only a basic knowledge of linear algebra and differential and integral calculus. Moreover, the large number of examples, worked out problems and exercises makes this the ideal book for independent study.

From reader reviews:

Lisa Morgan:

In this 21st centuries, people become competitive in each and every way. By being competitive today, people have do something to make these individuals survives, being in the middle of the crowded place and notice simply by surrounding. One thing that often many people have underestimated that for a while is reading. Yep, by reading a book your ability to survive enhance then having chance to stand than other is high. For you who want to start reading the book, we give you this particular Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) book as nice and daily reading e-book. Why, because this book is greater than just a book.

Rebecca Kurtz:

Here thing why this specific Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) are different and trustworthy to be yours. First of all reading through a book is good but it depends in the content of computer which is the content is as delightful as food or not. Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) giving you information deeper as different ways, you can find any reserve out there but there is no guide that similar with Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series). It gives you thrill studying journey, its open up your personal eyes about the thing which happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in recreation area, café, or even in your technique home by train. If you are having difficulties in bringing the printed book maybe the form of Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) in e-book can be your option.

Richard Thompson:

This book untitled Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) to be one of several books that best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit into it. You will easily to buy this particular book in the book retail outlet or you can order it via online. The publisher on this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Cell phone. So there is no reason for you to past this publication from your list.

Tara Winston:

Reading can called imagination hangout, why? Because when you are reading a book specially book entitled Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) your head will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely might be your mind friends. Imaging each and every word written in a guide then become one form conclusion and explanation this maybe you never get previous to. The Complex Analysis and Differential

Equations (Springer Undergraduate Mathematics Series) giving you yet another experience more than blown away your mind but also giving you useful facts for your better life on this era. So now let us teach you the relaxing pattern at this point is your body and mind will likely be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary paying spare time activity?
