Information Systems, Management, Organization and Control: Smart Practices and Effects (Lecture Notes in Information Systems and Organisation)

Information Systems, Management, Organization and Control: Smart Practices and Effects (Lecture Notes in Information Systems and Organisation)

This book explores the diversity of topics, views and perspectives focused on the relationship between information systems, organizations and managerial control. It brings together theories and practices by a diverse group of scholars working in different disciplines: organization, management, accounting, information systems development, human-computer interaction. The volume is divided into three sections, each one focusing on a specific theme: organizational change, innovation and information and communication technologies; organizational control, accounting and information systems; information, knowledge and project management practices. The book is based on a selection of the best research papers - original double blind peer reviewed contributions of the annual conference of the Italian chapter of AIS, held in Milan, Italy in December 2013.
