## Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology)

Fluvial-Tidal Sedimentology provides information on the 'Tidal-Fluvial Transition', the transition zone between river and tidal environments, and includes contributions that address some of the most fundamental research questions, including how the morphology of the tidal-fluvial transition zone evolves over short (days) and long (decadal) time periods and for different tidal and fluvial regimes, the structure of the river flow as it varies in its magnitude over tidal currents and how this changes at the mixing interface between fresh and saline water and at the turbidity maximum, the role of suspended sediment in controlling bathymetric change and bar growth and the role of fine-grained sediment (muds and flocs), whether it is possible to differentiate between 'fluvial' and 'tidally' influenced bedforms as preserved in bars and within the adjacent floodplain and what are the diagnostic sedimentary facies of tidal-fluvial deposits and how are these different from 'pure' fluvial and tidal deposits, amongst other topics.

The book presents the latest research on the processes and deposits of the tidal-fluvial transition, documenting recent major field programs that have quantified the flow, sediment transport, and bed morphology in tidal-fluvial zones. It uses description of contemporary environments and ancient outcrop analogues to characterize the facies change through the tidal-fluvial transition.

- Presents the latest outcomes from recent, large, integrated field programs in estuaries around the world
- Gives detailed field descriptions (outcrop, borehole, core, contemporary sediments) of tidal-fluvial deposits
- Accesses new models and validation datasets for estuarine processes and deposits
- Presents descriptions of contemporary environments and ancient outcrop analogues to characterize the facies change through the tidal-fluvial transition

### **From reader reviews:**

#### **Kathryn Cannon:**

The book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology) give you a sense of feeling enjoy for your spare time. You need to use to make your capable a lot more increase. Book can being your best friend when you getting anxiety or having big problem with the subject. If you can make studying a book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology) for being your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about many or all subjects. It is possible to know everything if you like start and read a publication Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology). Kinds of book are several. It means that, science guide or encyclopedia or other individuals. So , how do you think about this e-book?

#### **Mary Bunnell:**

The book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology) can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology)? Several of you have a different opinion about publication. But one aim in which book can give many information for us. It is absolutely right. Right now, try to closer with your book. Knowledge or data that you take for that, you may give for each other; you are able to share all of these. Book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology) has simple shape but you know: it has great and big function for you. You can search the enormous world by open and read a book. So it is very wonderful.

#### **Mario Curtin:**

The book with title Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology) possesses a lot of information that you can find out it. You can get a lot of profit after read this book. This particular book exist new information the information that exist in this e-book represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This specific book will bring you within new era of the internationalization. You can read the e-book with your smart phone, so you can read it anywhere you want.

#### **Helen Widner:**

E-book is one of source of know-how. We can add our know-how from it. Not only for students but in addition native or citizen want book to know the change information of year to be able to year. As we know those books have many advantages. Beside many of us add our knowledge, can bring us to around the world. Through the book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology) we can acquire more advantage. Don't someone to be creative people? To be creative person must choose to read a book. Just simply choose the best book that appropriate with your aim. Don't always be doubt to change your life with this book Fluvial-Tidal Sedimentology, Volume 68 (Developments in Sedimentology). You can

more pleasing than now.
