The Conduct of Hostilities under the Law of International Armed Conflict Yoram Dinstein

This is the seminal textbook on the law of international armed conflict, written by a leading commentator on the subject. The new edition has been thoroughly revised and updated, taking into account new developments in combat, numerous recent judicial cases (especially decisions rendered by the International Criminal Tribunal for the Former Yugoslavia), as well as topical studies and instruments. The text clarifies complex issues, offering solutions to practical combat dilemmas that have emerged in present-day battlefield situations. Several current (and controversial) subjects are examined in depth, including direct participation in hostilities, human shields, and air and missile warfare. Useful definitions and explanations have been added, making intricate problems easier to comprehend. The book is designed not only for students of international law, but also as a tool for the instruction of military officers.
