Calculus, Multivariable: Early Transcendental Functions

Robert Smith, Roland Minton

Calculus, Multivariable: Early Transcendental Functions Robert Smith, Roland Minton

Students who have used Smith/Minton's Calculus say it was easier to read than any other math book they've used. That testimony underscores the success of the authors' approach, which combines the best elements of reform with the most reliable aspects of mainstream calculus teaching, resulting in a motivating, challenging book. Smith/Minton also provide exceptional, reality-based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. New features include:

- A new organization placing all transcendental functions early in the book and consolidating the introduction to L'Hôpital's Rule in a single section.
- More concisely written explanations in every chapter.
- Many new exercises (for a total of 7,000 throughout the book) that require additional rigor not found in the 2nd Edition.
- New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects.
- New commentaries ("Beyond Formulas") that encourage students to think mathematically beyond the procedures they learn.
- New counterpoints to the historical notes, "Today in Mathematics," that stress the contemporary dynamism of mathematical research and applications, connecting past contributions to the present.
- An enhanced discussion of differential equations and additional applications of vector calculus.

From reader reviews:

Alvin Pryor:

This Calculus, Multivariable: Early Transcendental Functions are generally reliable for you who want to be a successful person, why. The key reason why of this Calculus, Multivariable: Early Transcendental Functions can be one of several great books you must have is definitely giving you more than just simple looking at food but feed you actually with information that perhaps will shock your earlier knowledge. This book is usually handy, you can bring it everywhere and whenever your conditions at e-book and printed versions. Beside that this Calculus, Multivariable: Early Transcendental Functions giving you an enormous of experience like rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day pastime. So , let's have it and revel in reading.

Tony Hill:

Your reading 6th sense will not betray an individual, why because this Calculus, Multivariable: Early Transcendental Functions guide written by well-known writer whose to say well how to make book that may be understand by anyone who read the book. Written in good manner for you, still dripping wet every ideas and producing skill only for eliminate your hunger then you still skepticism Calculus, Multivariable: Early Transcendental Functions as good book not only by the cover but also by the content. This is one e-book that can break don't ascertain book by its protect, so do you still needing yet another sixth sense to pick that!? Oh come on your looking at sixth sense already alerted you so why you have to listening to a different sixth sense.

Glenn Pryor:

Are you kind of hectic person, only have 10 or even 15 minute in your morning to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are experiencing problem with the book than can satisfy your short space of time to read it because this time you only find e-book that need more time to be examine. Calculus, Multivariable: Early Transcendental Functions can be your answer mainly because it can be read by you who have those short spare time problems.

Joseph Felder:

Reading a book to be new life style in this calendar year; every people loves to learn a book. When you study a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you want to get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, and soon. The Calculus, Multivariable: Early Transcendental Functions provide you with new experience in reading through a book.
