- Each theorist chapter concludes with an extensive bibliography outlining numerous primary and secondary sources of information ideal for research projects.
- Critical Thinking Activities at the end of each theorist chapter challenge you to process the theory presented and apply it to personal and hypothetical practice situations.
- Introductory chapters provide you with a strong foundation in the history and philosophy of science, logical reasoning, and the theory development process.
- Diagrams for theories help you visualize and better understand inherently abstract concepts.
- Each theorist chapter is written by a scholar specializing in that particular theorist's work - often an individual who has worked closely with the theorist.
- Most chapters have been reviewed and edited by the theorist for currency and accuracy, further validating the accounts set forth in the text.
- Theorist birth (and if applicable, death) dates help you place each individual into a time context.
- A new chapter introduces the theorist Afaf Meleis and covers her Transition Theory that has helped shape the theoretical development of nursing.
- Points for further study at the end of each chapter direct you to assets available for additional information.
- Need to know information is highlighted in at-a-glance summary boxes throughout to help you quickly review key concepts.
