Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods

Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods

Functional foods and nutraceuticals have received considerable interest in the past decade largely due to increasing consumer awareness of the health benefits associated with food. Diet in human health is no longer a matter of simple nutrition: consumers are more proactive and increasingly interested in the health benefits of functional foods and their role in the prevention of illness and chronic conditions. This, combined with an aging population that focuses not only on longevity but also quality of life, has created a market for functional foods and nutraceuticals.

A fully updated and revised second edition, *Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods* reflects the recent upsurge in "omics" technologies and features 48 chapters that cover topics including genomics, proteomics, metabolomics, epigenetics, peptidomics, nutrigenomics and human health, transcriptomics, nutriethics and nanotechnology. This cutting-edge volume, written by a panel of experts from around the globe reviews the latest developments in the field with an emphasis on the application of these novel technologies to functional foods and nutraceuticals.

From reader reviews:

Stephanie Knowles:

The book Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods? A number of you have a different opinion about guide. But one aim that will book can give many data for us. It is absolutely right. Right now, try to closer using your book. Knowledge or facts that you take for that, you are able to give for each other; you could share all of these. Book Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods has simple shape nevertheless, you know: it has great and large function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

Henry Knight:

As people who live in the actual modest era should be up-date about what going on or facts even knowledge to make them keep up with the era which is always change and make progress. Some of you maybe can update themselves by reading books. It is a good choice in your case but the problems coming to you actually is you don't know what one you should start with. This Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods is our recommendation so you keep up with the world. Why, as this book serves what you want and want in this era.

Sherry Clark:

Do you have something that you like such as book? The book lovers usually prefer to decide on book like comic, limited story and the biggest you are novel. Now, why not trying Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods that give your fun preference will be satisfied through reading this book. Reading practice all over the world can be said as the opportunity for people to know world much better then how they react toward the world. It can't be mentioned constantly that reading addiction only for the geeky person but for all of you who wants to end up being success person. So , for all of you who want to start examining as your good habit, you can pick Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods become your personal starter.

Alan Sarno:

What is your hobby? Have you heard this question when you got scholars? We believe that that query was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person just like reading or as reading through become their hobby. You need to understand that reading is very important and book as to be the thing. Book is important thing to increase you knowledge, except your own teacher or lecturer. You get good news or update concerning something by book. A substantial number of sorts of books that can you decide to try be your object. One of them are these claims Genomics, Proteomics and Metabolomics in Nutraceuticals and Functional Foods.
