**Mastering Algorithms with Perl** Jarkko Hietaniemi, John Macdonald, Jon Orwant

Many programmers would love to use Perl for projects that involve heavy lifting, but miss the many traditional algorithms that textbooks teach for other languages. Computer scientists have identified many techniques that a wide range of programs need, such as:

- Fuzzy pattern matching for text (identify misspellings!)
- Finding correlations in data
- Game-playing algorithms
- Predicting phenomena such as Web traffic
- Polynomial and spline fitting

Using algorithms explained in this book, you too can carry out traditional programming tasks in a high-powered, efficient, easy-to-maintain manner with Perl. This book assumes a basic understanding of Perl syntax and functions, but not necessarily any background in computer science. The authors explain in a readable fashion the reasons for using various classic programming techniques, the kind of applications that use them, and -- most important -- how to code these algorithms in Perl. If you are an amateur programmer, this book will fill you in on the essential algorithms you need to solve problems like an expert. If you have already learned algorithms in other languages, you will be surprised at how much different (and often easier) it is to implement them in Perl. And yes, the book even has the obligatory fractal display program. There have been dozens of books on programming algorithms, some of them excellent, but never before has there been one that uses Perl. **The authors include the editor of *The Perl Journal* and master librarian of CPAN; all are contributors to CPAN and have archived much of the code in this book there.** "This book was so exciting I lost sleep reading it." Tom Christiansen

### **From reader reviews:**

#### **Nathan Jackson:**

Hey guys, do you wish to find a new book you just read? Maybe the book with the name Mastering Algorithms with Perl suitable to you? The book was written by famous writer in this era. The book titled Mastering Algorithms with Perl is one of several books that will everyone read now. This kind of book was inspired many people in the world. When you read this guide you will enter the new way of measuring that you ever know before. The author explained their thought in the simple way, consequently all of people can easily to comprehend the core of this publication. This book will give you a lot of information about this world now. To help you to see the represented of the world within this book.

#### **Kirk Fonseca:**

Reading a publication tends to be new life style in this era globalization. With reading you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can certainly share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their own reader with their story as well as their experience. Not only the storyplot that share in the publications. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on earth always try to improve their proficiency in writing, they also doing some exploration before they write with their book. One of them is this Mastering Algorithms with Perl.

#### **Debra Lovern:**

Are you kind of active person, only have 10 or perhaps 15 minute in your time to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short time to read it because pretty much everything time you only find e-book that need more time to be go through. Mastering Algorithms with Perl can be your answer given it can be read by you actually who have those short free time problems.

#### **Hilary Rangel:**

What is your hobby? Have you heard that question when you got college students? We believe that that issue was given by teacher with their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person such as reading or as examining become their hobby. You need to understand that reading is very important as well as book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You will find good news or update concerning something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is this Mastering Algorithms with Perl.
