Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics)

Fred H. Croom

Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) Fred H. Croom

This text is intended as a one semester introduction to algebraic topology at the undergraduate and beginning graduate levels. Basically, it covers simplicial homology theory, the fundamental group, covering spaces, the higher homotopy groups and introductory singular homology theory. The text follows a broad historical outline and uses the proofs of the discoverers of the important theorems when this is consistent with the elementary level of the course. This method of presentation is intended to reduce the abstract nature of algebraic topology to a level that is palatable for the beginning student and to provide motivation and cohesion that are often lacking in abstract treatments. The text emphasizes the geometric approach to algebraic topology and attempts to show the importance of topological concepts by applying them to problems of geometry and analysis. The prerequisites for this course are calculus at the sophomore level, a one semester introduction to the theory of groups, a one semester introduction to point-set topology and some familiarity with vector spaces. Outlines of the prerequisite material can be found in the appendices at the end of the text. It is suggested that the reader not spend time initially working on the appendices, but rather that he read from the beginning of the text, referring to the appendices as his memory needs refreshing. The text is designed for use by college juniors of normal intelligence and does not require "mathematical maturity" beyond the junior level.

From reader reviews:

Sarah Ruff:

The publication untitled Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) is the publication that recommended to you to see. You can see the quality of the book content that will be shown to a person. The language that publisher use to explained their way of doing something is easily to understand. The article writer was did a lot of analysis when write the book, to ensure the information that they share to your account is absolutely accurate. You also might get the e-book of Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) from the publisher to make you a lot more enjoy free time.

James Oliver:

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its deal with may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer is usually Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) why because the wonderful cover that make you consider regarding the content will not disappoint anyone. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.

Eugene Brown:

Are you kind of active person, only have 10 as well as 15 minute in your time to upgrading your mind talent or thinking skill also analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short time to read it because all of this time you only find e-book that need more time to be study. Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) can be your answer since it can be read by anyone who have those short spare time problems.

Vanessa Kistler:

A lot of people said that they feel weary when they reading a e-book. They are directly felt this when they get a half regions of the book. You can choose the book Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) to make your current reading is interesting. Your own skill of reading ability is developing when you including reading. Try to choose basic book to make you enjoy you just read it and mingle the impression about book and examining especially. It is to be initial opinion for you to like to open up a book and study it. Beside that the reserve Basic Concepts of Algebraic Topology (Undergraduate Texts in Mathematics) can to be your brand new friend when you're experience alone and confuse in doing what must you're doing of the time.
