James M. Keller, Derong Liu, David B. Fogel

Fundamentals of Computational Intelligence: Neural Networks, Fuzzy Systems, and Evolutionary Computation (IEEE Press Series on Computational Intelligence) James M. Keller, Derong Liu, David B. Fogel

This book covers the fundamental topics that form the basis of computational intelligence, which are neural networks, fuzzy systems, and evolutionary computation. Unlike other introductory texts on computational intelligence, this book provides an in-depth and even treatment of the three fundamental topics and how they relate to one another. The text focuses on inspiration, design, theory, and practical aspects of implementing procedures to solve real problems. While existing books in the three fields that comprise computational intelligence are written by authors who know one discipline better than the others, this book is co-written by the current Editor-in-Chief of IEEE Transactions on Neural Networks and Learning Systems, the founding Editor-in-Chief of IEEE Transactions on Evolutionary Computation, and a former Editor-in-Chief of IEEE Transactions on Fuzzy Systems. Hence, coverage across the three topics is both uniform and consistent in style and notation.

From reader reviews:

Concepcion Maldonado:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each publication has different aim or perhaps goal; it means that book has different type. Some people sense enjoy to spend their time to read a book. They are reading whatever they consider because their hobby is usually reading a book. Think about the person who don't like reading a book? Sometime, man or woman feel need book if they found difficult problem as well as exercise. Well, probably you will want this Fundamentals of Computational Intelligence: Neural Networks, Fuzzy Systems, and Evolutionary Computation (IEEE Press Series on Computational Intelligence).

Mike Greene:

Book is written, printed, or highlighted for everything. You can recognize everything you want by a guide. Book has a different type. As you may know that book is important matter to bring us around the world. Close to that you can your reading skill was fluently. A publication Fundamentals of Computational Intelligence: Neural Networks, Fuzzy Systems, and Evolutionary Computation (IEEE Press Series on Computational Intelligence) will make you to become smarter. You can feel much more confidence if you can know about everything. But some of you think this open or reading the book make you bored. It isn't make you fun. Why they can be thought like that? Have you in search of best book or ideal book with you?

Derrick Tompkins:

As people who live in the particular modest era should be change about what going on or data even knowledge to make them keep up with the era which can be always change and move ahead. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to you actually is you don't know what type you should start with. This Fundamentals of Computational Intelligence: Neural Networks, Fuzzy Systems, and Evolutionary Computation (IEEE Press Series on Computational Intelligence) is our recommendation to make you keep up with the world. Why, because this book serves what you want and want in this era.

Steven Green:

The publication untitled Fundamentals of Computational Intelligence: Neural Networks, Fuzzy Systems, and Evolutionary Computation (IEEE Press Series on Computational Intelligence) is the guide that recommended to you to learn. You can see the quality of the book content that will be shown to anyone. The language that publisher use to explained their way of doing something is easily to understand. The article writer was did a lot of research when write the book, so the information that they share to you is absolutely accurate. You also could possibly get the e-book of Fundamentals of Computational Intelligence: Neural Networks, Fuzzy Systems, and Evolutionary Computation (IEEE Press Series on Computational Intelligence) from the

publisher to make you much more enjoy free time.
