Being a 16-year-old safecracker and active-duty daughter of international spies has its moments, good *and* bad. Pros: Seeing the world one crime-solving adventure at a time. Having parents with super cool jobs. Cons: Never staying in one place long enough to have friends or a boyfriend. But for Maggie Silver, the biggest perk of all has been avoiding high school and the accompanying cliques, bad lunches, and frustratingly simple locker combinations.

Then Maggie and her parents are sent to New York for her first solo assignment, and all of that changes. She'll need to attend a private school, avoid the temptation to hack the school's security system, and befriend one aggravatingly cute Jesse Oliver to gain the essential information she needs to crack the case . . . all while trying not to blow her cover.
