Underwater Acoustic Digital Signal Processing and Communication Systems

Underwater acoustic digital signal processing and communications is an area of applied research that has witnessed major advances over the past decade. Rapid developments in this area were made possible by the use of powerful digital signal processors (DSPs) whose speed, computational power and portability allowed efficient implementation of complex signal processing algorithms and experimental demonstration of their performance in a variety of underwater environments. The early results served as a motivation for the development of new and improved signal processing methods for underwater applications, which today range from classical of autonomous underwater vehicles and sonar signal processing, to remote control underwater wireless communications. This book presents the diverse areas of underwater acoustic signal processing and communication systems through a collection of contributions from prominent researchers in these areas. Their results, both new and those published over the past few years, have been assembled to provide what we hope is a comprehensive overview of the recent developments in the field. The book is intended for a general audience of researchers, engineers and students working in the areas of underwater acoustic signal processing. It requires the reader to have a basic understanding of the digital signal processing concepts. Each topic is treated from a theoretical perspective, followed by practical implementation details. We hope that the book can serve both as a study text and an academic reference.

From reader reviews:

Martin Sanchez:

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what you problem? How about your time? Or are you busy individual? If you don't have spare time to do others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. The doctor has to answer that question mainly because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this kind of Underwater Acoustic Digital Signal Processing and Communication Systems to read.

Kristi Goins:

Typically the book Underwater Acoustic Digital Signal Processing and Communication Systems will bring you to the new experience of reading a new book. The author style to describe the idea is very unique. In case you try to find new book to learn, this book very suitable to you. The book Underwater Acoustic Digital Signal Processing and Communication Systems is much recommended to you to learn. You can also get the e-book in the official web site, so you can quicker to read the book.

Frank Cockerham:

What is your hobby? Have you heard which question when you got scholars? We believe that that question was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person just like reading or as reading become their hobby. You must know that reading is very important along with book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update regarding something by book. Amount types of books that can you choose to use be your object. One of them are these claims Underwater Acoustic Digital Signal Processing and Communication Systems.

Annie Rose:

Some individuals said that they feel uninterested when they reading a e-book. They are directly felt it when they get a half areas of the book. You can choose the particular book Underwater Acoustic Digital Signal Processing and Communication Systems to make your current reading is interesting. Your personal skill of reading skill is developing when you similar to reading. Try to choose simple book to make you enjoy to learn it and mingle the idea about book and examining especially. It is to be very first opinion for you to like to open up a book and go through it. Beside that the reserve Underwater Acoustic Digital Signal Processing and Communication Systems can to be your new friend when you're sense alone and confuse in what must you're doing of the time.
